

# PLUTONIUM™

ULTRA SUPREME PROFESSIONAL GRADE AEROSOL PAINT

**NEW!**

*12 oz. Aerosol Cans - Approximately 2.5x the paint of other brands!*

Plutonium exterior/interior aerosol paint provides a premium coating that resists dripping, chipping, cracking and peeling. It is environmentally friendly, and by using a 70% pigment load and 30% propellant, it has over twice the coverage of other aerosol paints, thereby reducing its carbon footprint by 50%. A few of its innovative features are an ergonomically seamless can and custom valve system that allows the can to be held at any angle (360°!) while spraying without clogging. Its interchangeable actuator system creates variable spray patterns from 1/16" to over 10" wide. The exclusive carded Pro-Cap actuator 6-pack offers the user a variety of widths to work with. Plutonium paint dries in 3-5 minutes, no primer necessary, covers in one pass, sprays wet over wet, is mold, mildew and fade-resistant, has UV protection and a 5-year shelf life. It will not interfere with the use of, or in combination with, other aerosol paints, which often crystallize when multiple brands are used together. Ideal for metal, masonry, wood, wicker, paper, and some rubber and plastic surfaces for a smooth, durable, matte finish. A pleasant fragrance masks the odor typical of most aerosol paints. Color palette consists of 33 vivid opaques, 3 metallics and 4 translucents. **Made in the USA. Born and raised in Detroit.**

*Spray at any angle!  
Even upside down!*
